Report Comments

This report presents feedback received from students for the course **CALCULUS II** and for the Instructor **Aristomenis Papadopoulos** in that course. Course means are calculated from all responses by all students in the unit (i.e., course section/lecture) on that item and exclude N/A (not applicable) responses.

Indication is provided below for the Report Group if there is one affiliated with this course section, otherwise it is blank. The Report Group will be the lead section of a grouped course (i.e. multi-section lecture) and/or the primary of cross-listed courses. Subsections are found in the Instructor Subgroup Report.

What about the course and/or instruction most enhanced your learning?

Comments
The professor definitely enhanced my learning. He would go over material whenever someone asked to, and would go over it multiple times to ensure that the students understand what is being addressed.
The lectures were extremely clear and Aris always made sure everyone understood what was going on before moving forwards. I also loved the homework and got a lot of enjoyment when solving the problems. The homework was the best part of this course mainly because it felt like I was doing real thinking and truly understanding the material on a deeper level and solving problems beyond a memorized algorithm.
I liked how the course was paced on how well the class was doing instead of having a strict schedule.
Small lectured allowed to ask questions in a fairly difficult class.

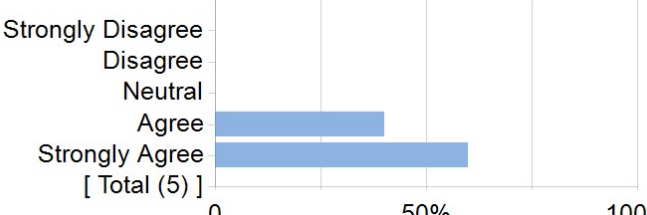

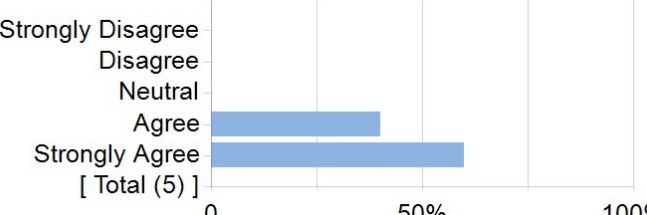

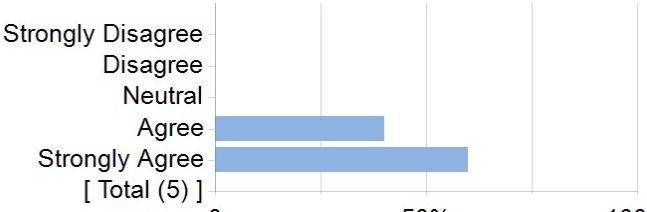

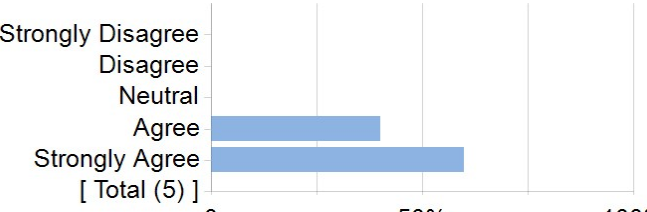

What about the course and/or instruction can be improved the next time it is offered?

Comments
The course was already perfect for me. I have no idea what to improve on.
I honestly wouldn't change anything. The only thing is I don't think we ever actually got the homework papers back, but that's a really small thing.
Maybe a better classroom would be helpful
class is good as is
